Section 3: General Practices' Use of Medical Equipment

Section 4: General Practices' Use of Information Technology

Section 5: Discussion

Appendix 1: Survey Methodology

Appendix 2: Survey Response Rates

Appendix 3: Chi Square Tests of Association

Description

The study, 'General Practice in Ireland in 2010: A Survey of Staff and Equipment' was a joint study by the Departments of Economics and General Practice at UCC. The researchers found that investment in general practice nationally has increased during the past five years. The survey of 600 GPs focused on practice investment in staff, medical equipment and information technology.
