Appendix D: Removing PPE

Appendix E: Antiseptic and Cleaning Agents

Appendix F: A-Z of Equipment and Recommended Decontamination

Description

This document is for HSE health care workers (HCWs) in counties Dublin, Louth, Meath, Cavan and Monaghan and outlines recommendations for the prevention and control of infection in community care settings, primary care and in the client's home. These are guidelines and should not supersede existing local policies and

procedures. While this guideline has been developed by staff in the Health Service Executive (HSE), it may be a useful resource for HCWs in the private and voluntary sector.
