HCAI/AMR Newsletter Mar 2014: Healthcare Associated Infections (HCAI) and Hand Hygiene

Author: O'Connor, Nuala Dr.

Publication Year: 2014

Download

- [HCAI/AMR Newsletter Mar 2014](#) (208k)

Contents

- 1.How might a patient acquire an infection while in the general practice environment?
- 2.When should you perform hand hygiene in the general practice setting?
- 3.How can you perform hand hygiene in the general practice setting?
- 4.Hand hygiene facilities for general practice – what is recommended?
- 5.What might happen in the future in general practice? What might HIQA look for?

Description

This newsletter aims to highlight HCAI/AMR issues relevant to general practice. Hand hygiene is recognised globally as one of the most important methods of preventing health-care associated infections (HCAI). This newsletter focuses on hand hygiene.
