## Contents

Statistics and Ethics in Medical Research

1. Misuse of statistics is unethical
2. Study design
3. How large a sample?
4. Collecting and screening data
5. Analysing data
6. Presentation of results
7. Interpretating results
8. Improving the quality of statistics in medical journals

Statistics in Question

Assessing Clinical trials

1. First steps
2. Trial size
3. Design I
4. Design II
5. Why randomise?
6. Simple randomisation
7. Restricted randomisation
8. Between-observer variation
9. Double-blind trials
10. Trial discipline

11. Record sheets
12. Protocol and monitoring
13. Rash adventures

#### Assessing methods

14. Descriptive statistics and graphs
15. Transforming the data
16. Art of significance testing
17. Confidence intervals
18. Recognising linearity
19. Initial impressions
20. Survival
21. Many variables
22. Critical comment
23. Statistical distributions

#### Index

<b>Format</b>	Print
