SUGGESTED ACTIONS: In the office	36
References	37

Description

The Irish College of General Practitioners (ICGP) Sustainability Working Group was formed in Summer 2020 to raise awareness among general practitioners, practice nurses and practice staff of the need to consider the environment and the future sustainability of healthcare delivery to our patients. Developing this ‘Glas toolkit’ for sustainable practice-based actions and activities tailored to Irish general practice has been a major objective of the ICGP Sustainability Working Group.

Format Download

Keywords climate, sustainability, planetary health, prescribing, asthma, antibiotics, Management and referral, screening, physical health, nutrition, social prescribing, breastfeeding, office buildings, energy, waste disposal
