Description

This report was developed as part of Pfizer's 'Way2Go' initiative which has been in existence since 2005 and aims to improve the health and wellbeing of Irish children. 'The Voice of Young People - A Report on Attitudes to Sexual Health', incorporates the results of qualitative research conducted with young people aged 18 -20 years and parents of 14-16 year olds. The Report seeks to understand young people's level of sex education, awareness and understanding of STIs and if and how this knowledge impacts their attitudes to sex and in particular the practising of "safe sex".
