

# National Prostate Cancer GP Referral Guideline

**Author:** National Cancer Control Programme;HSE

**Publication Year:** 2018

## Download

- [National Prostate Cancer Referral Form](#) (143k)
- [NCCP Prostate Cancer GP Referral Guidelines](#) (983k)

## Contents

Men who present with symptoms suspicious of advanced prostate cancer

Men between 50 and 70 years of age with no symptoms

Men under 50 years of age with no symptoms

Men greater than 70 years of age with no symptoms

Men of any age who present with Lower Urinary Tract Symptoms (LUTS)

## Description

These guidelines are based on the latest evidence and aim to provide GPs with information on how to refer patients with suspected prostate cancer to one of the eight Rapid Access Prostate Cancer Clinics located in each of the eight cancer centres. The NCCP worked closely with multidisciplinary prostate cancer teams and in conjunction with prostate cancer patients.
