

# Exploring the dimensions of performance assessment in general practice training:

**Author/Researcher:** Dr. Ann Marie Burke

## Description

Exploring the dimensions of performance assessment in general practice training: creating and implementing a performance assessment tool in a general practice training scheme using mixed methods research (Creswell, John W., and Plano Clark, Vicki L., 2007)

## Objectives

The study addresses performance assessment in general practice training. The purpose will be to develop and test a performance assessment instrument using an exploratory sequential design. The first phase of the study will involve a qualitative exploration of trainers' views on performance dimensions in general practice training.

Data will be collected from participating trainers at the South East general practice training scheme. This information will be used to develop a performance assessment instrument.
