1. Introduction and background

Evidence for CME

Irish General Practice

1.2.1. Urban and rural General Practice in Ireland

Small Group Learning (SGL)

1.3.1. Small Group CME in Ireland

1.3.2. Recent evidence for Irish CME-SGL

2. Study Design

Study aim

2.1.1. Specific study objectives

2.1.2. Measurable outcomes

Methods

Ethical approval

Thesis outline

3. Continuing education for general practitioners working in rural practice: a review of the literature

Context within overall thesis

Abstract

Introduction

3.3.1. Recommendations for practice

Methods

Results

3.5.1. Small group continuing medical education for rural GPs

3.5.2. Workshops for rural GPs

3.5.3. Distance learning CME/CPD programmes designed specifically for rural GPs

Discussion

3.6.1. Key findings

3.6.2. How findings relate to existing literature

3.6.3. Methodological considerations

3.6.4. Recommendations for practice

4. What are the current 'top five' perceived educational needs of Irish general practitioners?

Context within overall thesis

Abstract

Introduction

Methods

Results

Discussion

4.6.1. Key findings

4.6.2. How this relates to other literature

4.6.3. Methodological considerations

4.6.4. Recommendations for practice

5. Does locally delivered small group continuing medical education (CME) meet the learning needs of rural general practitioners?

Context within the overall thesis

Abstract

Introduction

Methods

Results

Discussion

5.6.1. Key findings

5.6.2. How this relates to other literature

5.6.3. Methodological considerations

5.6.4. Recommendations for practice

6. How does small group continuing medical education (CME) impact on practice for rural GPs and their patients? A mixed methods study

Context within overall thesis

Abstract.

Introduction

Methods

Results

Discussion

6.6.1. Key findings

6.6.2. How this relates to other literature

6.6.3. Methodological considerations

6.6.4. Recommendations for practice

7. Impact of participation in Continuing Medical Education small group learning (CME-SGL) on the stress, morale, and professional isolation of rural general practitioners

Context within overall thesis

Abstract

Introduction

7.3.1. What this study adds

Methods

7.4.1. Design

7.4.2. Participants and recruitment

7.4.3. Data Collection

7.4.4. Analysis

Results

7.5.1. Stress

7.5.2. Morale

7.5.3. Professional isolation

Discussion

7.6.1. Key findings

7.6.2. Methodological considerations

7.6.3. How this relates to other literature

7.6.4. Recommendations for practice

8. Discussion and conclusion

Summary

Strengths and Limitations

8.2.1. Strengths

8.2.2. Limitations

Comparison with other work

8.3.1. Other CME groups in Europe
