ICD10 Codes for Revised GP contract 2020

Condition	ICD10 codes
Ischaemic heart disease	• I25 – Chronic ischaemic heart disease
CVA/TIA	• G45 – Transient cerebral ischaemic attacks and related syndromes • I64 Stroke, not specified as haemorrhage or infarction
Atrial fibrillation	• I48 Atrial fibrillation and flutter
Heart failure	• I50 Heart failure
Asthma	• J45 Asthma
COPD	• J44 - Chronic obstructive pulmonary disease
Diabetes	• E11 Type 2 Diabetes Mellitus

Optional information which may be useful to record with the code

COPD	ICD10 code - date - Spirometry Result (if known)	• J44– Chronic obstructive pulmonary disease – FEV1 56% - GOLD Grade 2 (2016)
Ischaemic heart disease	ICD10 code – date – arteries affected if known – treatment if relevant e.g. coronary artery bypass graft (CABG)	• I25– Chronic ischaemic heart disease – diffuse atherosclerosis on angiogram 2017 • I25 - Chronic ischaemic heart disease – CABG x 2 2016 • I25 - Chronic ischaemic heart disease – Myocardial infarction 2009 •
CVA/TIA	ICD10 code – bleed or haemorrhage – location if known – other treatment e.g. thrombolysis, carotid endartectomy	• I64 – Stroke – thromboembolic left middle cerebral artery 2018 • I64 – Stroke – thromboembolic left thalamic bleed 2015 • G45– Transient cerebral ischaemic attacks – left carotid endarterectomy 2018
Atrial fibrillation	ICD10 code – permanent or paroxysmal – other treatments if relevant e.g cardioversion/ablation	• I48 –Atrial fibrillation – permanent 2019 • I48 –Atrial fibrillation – permanent – Cardioversion x 2 2012 • I48 –Atrial fibrillation – paroxysmal –pulmonary vein isolation procedure 2017
Heart failure	ICD10 code – aetiology if known – baseline EF if known – most recent EF if known	• I50 – Heart failure – Aetiology: hypertension - EF 40% at baseline 2017– EF 65% 2019 • I50 – Heart failure – Aetiology: unknown – No echo available
