

The National Specialist
Training Programme in
General Practice

Prospectus 2023

#BEAGP

www.beagp.com

www.icgp.ie

Welcome

It gives me great pleasure to introduce the wonderful medical specialty of General Practice. I hope you will find the information contained in this 'National Specialist Training Programme in General Practice' prospectus a useful tool in informing and guiding you on your decision to apply for GP Training.

In this prospectus you will find key information on our vision for GP training, our mission, and values, together with the facts about the National GP training programme, the process of recruitment to the programme and details on each of the training schemes.

Since March 2021, the ICGP has had sole responsibility for postgraduate medical training in the specialty of General Practice. As part of this responsibility, the ICGP designs and delivers a world-class, highly innovative and continuously improving GP training scheme, as set out in our vision, mission and values statement.

There are currently over 900 trainees enrolled on the GP training programme and we intend to increase our annual intake into training in 2023.

There is a national shortage of GPs, and you will thus be joining this programme and specialty at a most exciting time with numerous opportunities awaiting you on completion of your training.

I am pleased to announce that the ICGP will be moving from traditional shortlisting based on information provided on the application form, to the introduction of Situational Judgement Test (SJT) and Clinical Knowledge Test (CKT). These methods of pre-training assessment are widely used and have a comprehensive evidence-base with a sound theoretical foundation, and we are confident that they will enhance our recruitment process.

Dr Martin Rouse

National Director of Specialist Training in General Practice

THE IRISH COLLEGE OF GENERAL PRACTITIONERS

The Irish College of General Practitioners is the postgraduate training body (PGTB) responsible for postgraduate education, training, and research in the specialty of General Practice. The College has a national advisory role in relation to medical standards and engages with the Medical Council, Department of Health, the Health Service Executive, National Doctors Training & Planning and the Health Information & Quality Authority amongst others. As a membership organisation, the ICGP is responsible for providing and supporting continuous professional development for general practitioners, numbering over 4,500. The ICGP is the PGTB accredited by the Medical Council to provide professional training for doctors wishing to enter the speciality of General Practice.

Vision Statement

Every patient and their community has access to a professional, committed, and holistic GP, who has the ability to respond to the physical, psychological, and social health needs of their patients and the communities in which they practise.

Values Statement

The national training programme is based on the values of community responsiveness, patient-centredness, high quality, evidence-based practice, and holistic care.

Mission Statement

The mission of the training programme is to train doctors to be professional, competent, community-adaptive, and fulfilled GPs in an effective and equitable way that meets the current and future needs of patients, trainees and the profession.

This is done by providing an appropriate combination of workplace learning, taught elements, self-reflection, mentoring, and peer learning, in a variety of settings, to foster individual progression from novice to independent practitioner and instil habits of life-long learning.

WHY GENERAL PRACTICE?

Make a real difference

- Be a GP and make a **genuine difference** to the lives of people and communities.
- Watch your patients **grow and recover**, adapt and change.
- **Be part of a team** that makes a difference to an individual by listening, helping and being **passionate** about their care and their lives.
- Enjoy the **diversity**.
- Be a listener.
- Be a **problem-solver**.

Enjoy a balanced life

- Be a GP and **control your hours**, define your day.
- Protect your time to learn and **work to live**, not live to work.
- Enjoy a life with **independence and flexibility**.
- Have a **family-centred lifestyle**, in the heart of your **community**.

Be a generalist and a specialist

- Be a GP and be a **diagnostic powerhouse**, challenged by every patient who walks through your door.
- In any one day, **diagnose a wide variety of conditions**, from heart disease to depression, minor surgery and paediatrics – helping patients with all medical presentations.
- **Partake in lifelong learning**, with CME, **supportive professional networks** and opportunities to **develop special interests**.

WHY OUR TRAINEES CHOOSE GENERAL PRACTICE AS A CAREER

WHY THE ICGP GP TRAINING PROGRAMME?

ICGP General Practice Training Programme

Recognition of Prior Learning Pathway

Applicants that have completed or are currently completing BST and relevant examinations in Medicine, Emergency Medicine or Paediatrics may apply for RPL.

Medicine or Emergency Medicine recognition of up to one year may be awarded, reducing your time in GP training to three years.

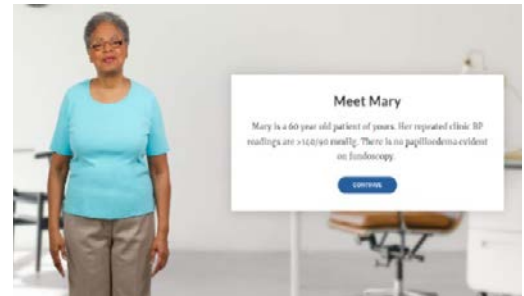

For those eligible for RPL in Paediatrics training time is reduced by four months.

[Recognition of Prior Learning 2023](#)

Methods of teaching and learning

Small group teaching at day release facilitates reflective practice for the trainee with their peers and educational supervisor. Practical and simulated training in a supportive environment is a central feature.

The Digital Resources Hub gives trainees access to a suite of interactive, case based and accessible blended learning on key curriculum topics.

Assessment

The ICGP uses Irish General Practice-specific Entrustable Professional Activities (EPAs), based on the ICGP curriculum, to facilitate trainee learning and assessment. Training continues to be learner-centred, but

innovative, in its delivery. Emphasis is placed on workplace-based feedback using the EPA framework for trainee learning as opposed to of trainee learning. Trainees are encouraged to actively seek feedback from their clinical teachers to correct, refine and boost their learning, and to readily demonstrate professional and clinical growth throughout their training. Tailored software, available as both an App and website, has been designed to support EPA feedback and guide trainee learning. Trainees will regularly review their workplace-based feedback records with clinical and educational supervisors. EPA feedback records will also be reviewed by a Competency Committee to assess progression and support trainee to reach their training goals. In addition to demonstrating clinical competence using the EPA framework, trainees will also be required to pass summative assessments including an online MCQ clinical knowledge-based assessment (CKT Exam) and a simulated GP Surgery assessment (CCT Exam).

ICGP SUPPORTS

Network of GP Trainees

The Network is the general practice trainee voice on training matters. Any trainee can be a committee member. There are two trainees per scheme.

Aims of the Network of GP Trainees

- To advocate for trainees – education, training and professional development
- To represent trainees at the ICGP and other bodies
- To encourage collaboration between trainees on different schemes
- To encourage involvement of trainees in college
- To keep trainees well informed on education and training related issues

The Network of Establishing GPs (NEGS)

ICGP NEGs Programme provides a suite of supports and services to establishing College members. ICGP members are considered to be a NEGs member from the 4th year of training until 5 years from the date of graduation.

The aim of ICGP NEGs is to support establishing members and foster active involvement in college.

Their publication 'Signposts to Success' is an exceptional resource for those on financial or career advice.

The ICGP Library and Information Service

The ICGP library's main function is to support Trainees and the wider membership of the College by providing access to relevant publications. It provides access to high-quality, evidence-based information relevant to Irish general practice.

Library Services:

- Literature searches: Assist in carrying out literature searches on clinical topics as requested.
- Library catalogue: Includes access to ICGP resources, Forum journal articles and ICGP publications and statements.
- Online resources: Useful links to external organisations, databases, newsletters and ICGP Help Sheets.

Doctors Health Programme

The aim of the ICGP Doctors' Health in Practice Programme is:

- To motivate every GP and GP Trainee to register with a GP and to consult their GP for symptom management, medical investigations, prescriptions and referrals to other doctors and health services.
- To reinforce GP healthcare / primary health care as first point of care for every doctor.
- To promote and support good physical health, occupational health, psychological health and wellbeing for GPs and GP Trainees.
- To enhance GPs and GP Trainees wellbeing activities outside work, for example physical activities, community volunteerism, hobbies and creative arts.

[Doctors' Healthcare Support](#)

Policies to Support you in Training

As well as downloading the above, please visit the [curriculum section](#) of our website.

During the four-year training programme, the trainee will encounter a diverse range of experiences and challenges, most of which will be routine. However, the ICGP recognises that although life as a trainee can be very rewarding there are occasions when trainees may need further support. The College has developed a suite of policies, which are constantly evolving, and are designed to support all trainees throughout their training.

MICGP Qualification

On successful completion of training and MICGP examinations, ICGP trainees are awarded a Certificate of Satisfactory Completion of Training which will enable registration on the Medical Council Register as a Specialist in the Division of General Practice.

OVERVIEW OF THE NATIONAL GP TRAINEE RECRUITMENT PROCESS

STEP 1

Application: Online application opens mid-October each year and remains open for approximately 5 weeks. Applicants complete a detailed application form, pay an application fee and submit all relevant supporting documentation by closing date (including supporting documentation for IMC and HSE eligibility).

STEP 2

Eligibility: Applications are reviewed to ensure the appropriate supporting documentation confirming that requirements for HSE English language competency and eligibility for the trainee specialist register are met.

STEP 3

Shortlisting: Shortlisting is based on performance at SJT and CKT tests and on applicants having completed a minimum of nine months clinical experience. The clinical experience must be paid full time (or equivalent), postgraduate acute hospital based, either as an intern or SHO by the time of starting GP training in July 2023. Applicants are required to provide details of hospital experience on the application form.

STEP 4

Reference Upload and Interview Consent: Candidates invited to interview are required to complete an online validation and consent process prior to interview. This includes uploading BST references x 2, ID and declaration form.

STEP 5

Interview: Candidates will be assessed on a number of core competencies.

STEP 6

Scheme Selection: Following interview, candidates will be required to select training scheme preferences (online).

STEP 7

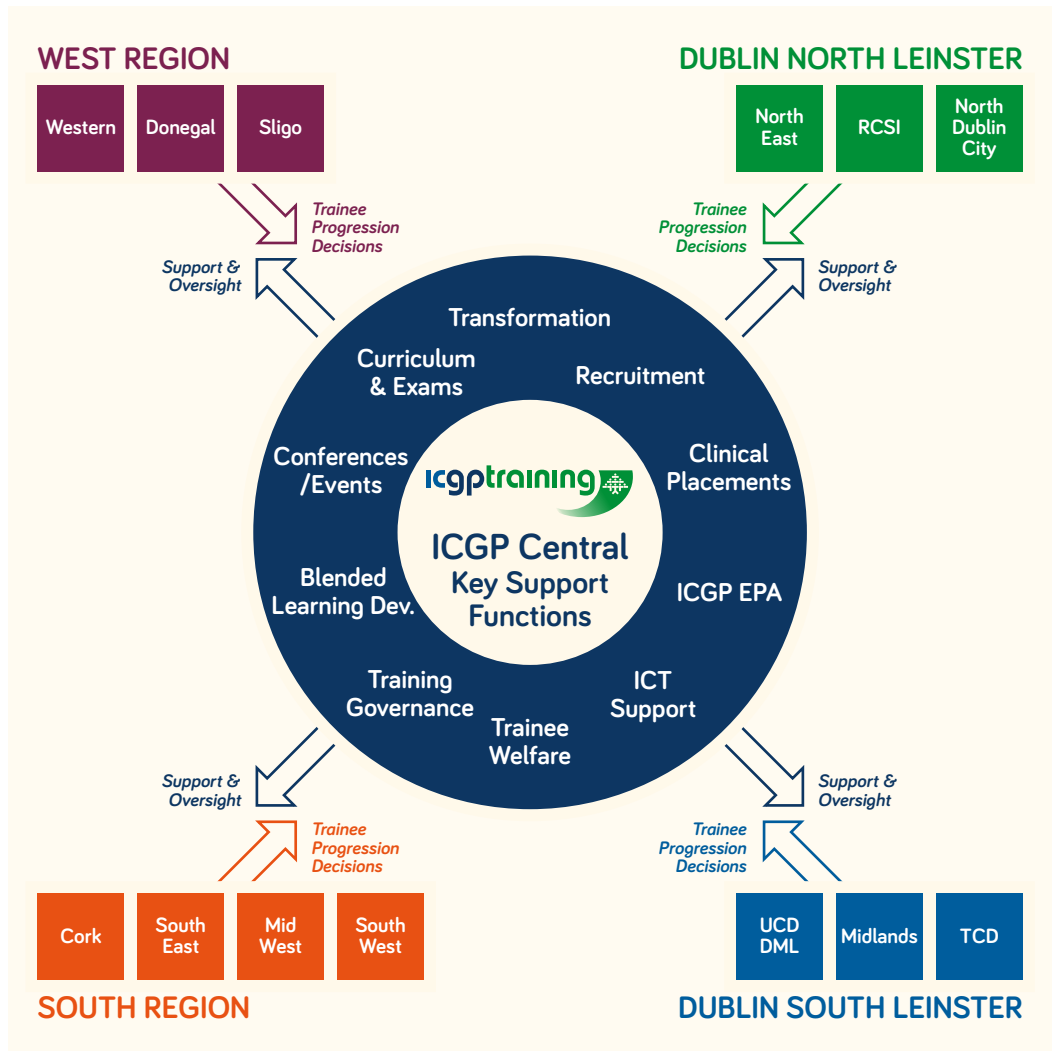

Rank and Match: A rank and match is undertaken, taking into account the number of available places on schemes, [HSE national policy on the allocation of training places](#), and candidates' total overall score and training scheme preferences.

STEP 8

Offers: Offers are made in rank order in accordance with the national allocation policy. A candidate may either accept the offer, reject it or withdraw from the process.

Applicants are advised to review [Guide to Applicants](#) in conjunction with this prospectus.

HOW THE SCHEMES ARE REGIONALISED

Training sites outlined below are not definitive. They are for guidance and will be subject to change.

The ICGP and each individual Training Scheme aspires to ensure that allocation of trainees to training posts is fair and transparent. Some Schemes may have training posts that are preferred by trainees; this can make it difficult to facilitate every trainee with their first choice post. As a consequence, training posts may be allocated randomly, according to a trainee’s prior experience or due to local work force requirements. If offered a place on the Training Programme, applicants must be aware that at all stages throughout the training process it may not be possible to facilitate allocation to preferred training sites or posts, and that they must accept the hospital posts and GP training practices assigned to them by their Training Scheme.

WEST REGION

DONEGAL

Scheme Director	Dr. Katherine Murray and Dr. Mark Hudson
Scheme Contact Details	074 91 23742 donegal.scheme@icgp.ie
Location of Day Release	Education Centre, St. Conal's Hospital, Letterkenny, Co. Donegal
